A46030
gonadoliberin I - spiny dogfish
Sylternate names: gonadotropin-releasing hormone
N;Alternate names: gonadotropin-releasing hormone
C;Species: Squalus acanthias (spiny dogfish)
C;Date: 06-3n-1995 #sequence_revision 06-Jan-1995 #text_change 09-Jul-2004
C;Accession: A46030
C;Accession: A46030
C;Accession: A46030

                                                                                                                                                                                                                                                                                                                                                                                           RESULT 61

C41225

C01225

C01226: Resistance protein - Pseudomonas syringae pv. tomato (fragment)

C,Species: Pseudomonas syringae pv. tomato

C,Species: Pseudomonas syringae pv. tomato

C,Date: 19-Jun-1992 #sequence_revision 19-Jun-1992 #text_change 24-Jun-1993

C,Accession: C41225

C,Accession: Cadesey, D.A.

Proc. Natl. Acad. Sci. U.S.A. 88, 8915-8919, 1991

A,Title: Copper resistance in Pseudomonas syringae mediated by periplasmic and outer mA, Title: Copper resistance in Pseudomonas syringae mediated by periplasmic and outer mA, Title: Copper resistance in Pseudomonas syringae mediated by periplasmic and outer mA, Title: Copper resistance in Pseudomonas syringae mediated by periplasmic and outer mA, Title: Copper resistance in Pseudomonas syringae mediated by periplasmic and outer mA, Recession: C41225

A, Moccession: C41225

A, Molecule type: protein

A, Residues: 1-5 cCHA>
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    ö
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        ö

J. Biol. Structural analysis of cross-linking domains in cartilage type XI collagen. Ins)
A;Reference number: A56978; MUID:95370194; PMID:7642541
A;Reference number: D56979
A;Refaces: preliminary
A;Molecule type: protein
A;Residues: 1-6 <WUA>
A;Note: the residue designated "X" is modified Lysine in collagen 1(II) some cross-linker
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          ribosomal protein MRP-S23, mitochondrial - bovine (fragment)
C;Species: Bos primigenius taurus (cattle)
C;Accession: S78764
R;Graack, H.R.
submitted to the Protein Sequence Database, July 1999

A43001
cholecystokinin - tammar wallaby
N.Alternate names: CCK
C;Species: Macropus eugenii (tammar wallaby)
C;Gate: 30-Oct-1992 #sequence_revision 30-Oct-1992 #text_change 09-Jul-2004
C;Accession: A43001; PQ0012
R;Ran, Z.W.; Eng, J.; Shaw, G.; Yalow, R.S.
Peptides 9, 429-431, 1988
A;Title: Cholecystokinin octapeptide purified from brains of Australian marsupials.
A;Reference number: PQ0012; MUID:88234141; PMID:3375140
A;Accession: A43001
A;Molecule type: protein
A;Molecule type: protein
A;Residues: 1-8 <FAN>
A;Cross-references: UNIPROT:P30369
C;Superfamily: qastrin
C;Keywords: amidated carboxyl end; hormone, neuropeptide; sulfoprotein
F;2/Binding site: sulfate (Tyr) (covalent) #status predicted
F;8/Modified site: amidated carboxyl end (Phe) #status predicted
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      C;Accession: A39892
